

Business WIFI - NO UPFRONT COSTS!

WIFI scaled to thousands of users

- **Latest WIFI hardware technology** - WIFI 6, 802.11ax compatible Access Points
 - fastest speeds ➢ better virtual meetings ➢ best video streaming
- Users can move around the building without losing the WIFI signal
- **Security is first place.** All traffic remains encrypted with AES 256 - a military grade encryption and better privacy protection
- **HIPAA compliant** hardware is used where required
- **Guest WIFI** available - guest users only have Internet access in isolation mode
- We work with a choice of vendors like: Cambium, Aruba, Ruckus, Ubiquiti, and others
- Upon request we can provide network documentation, performance reporting, and heat maps of WIFI coverage
- With a support contract, all of this can come at **no upfront costs to you.** This saves the capital expenses to help grow your business
- Our engineers have experience supporting government facilities, large medical hospitals, and other business scenarios
- Our pledge: **Your Network Will Work. No Excuses!**
